Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either cba2@sasktel.net or zaharychukd@agr.gc.ca

The appreciation of the Canadian dollar, the uncertainty created by increased E. coli testing of meat exported to the U.S. and the high feed costs have created price pressures on live bison in Canada. Meat prices in Canada are also experiencing some downward pressure.

These factors are also placing downward pressures on this fall's calf prices.

Some uncertainty will be removed from the marketplace if there is a smooth transition to the provisions of Rule 2 in the U.S.

Implementation of the rule will allow for live bison born after March 1, 1999 to be exported to the US for slaughter and will also allow for

meat from all bison to be shipped into the US under certain conditions.
