

Keegan Kitzul

Keegan is co-owner of Roaming K Bison located by Foam Lake, Saskatchewan. I'm a 5th generation grain farmer and 2nd generation Bison Rancher, I farm alongside my parents Dale and Laurie. I was fortunate to start buying land and bison at a young age, and with a good sense of direction I've been able to help add to the farming operation. We currently run 200 cow calf pairs along with feeder and breeding stock. With a tough grading system for breeding stock we continue to improve our herds' genetics and size of operation to help supply the huge demand. Being young in the industry, I've been able to experience some of the ups and downs, so with the high demand in all classes of stock I see great potential in upcoming years for the Bison industry and look forward to meeting new and old producers and being part of the industry as a whole.
