Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either cba2@sasktel.net or stefan.schneider@canada.ca

Prices offered to producers to mid-September were softer. Prices offered were \$5.80- \$6.00 per pound HHW for Grade "A" bulls. U.S. buyers are offering prices that equate to \$6.00 Canadian with returns dependent on quality, transport incentives and export costs. Canadian buyers are paying \$5.60 \$6.00 per pound HHW for Grade "A" heifers. U.S. buyers are offering prices that equate to Canadian prices with returns dependent on quality, transport incentives and export costs.

Nationally, federal slaughter in Canada for the first 31 weeks of 2018 reached 5,381 head – down 9.1% from the 5,918 animals slaughtered for the same period in 2017. Live animal exports to the US for the first six months in 2018 totalled 10,202 head – down 15.4% from the 12,062 head exported in 2017.

Marketers report that although the demand for bison trim is steady, there is trim inventory that must be reduced. The demand tenderloins continues to be strong with a steady demand for rib-eyes and a weaker demand for striploins and top sirloins. US demand continues to be steady. With the Comprehensive Economic Trade Agreement with the European Union in effect since September 21, 2017, European demand continues to adjust to the CETA agreement with Brexit create some uncertainty in Europe.

Canadian demand is stable. The Canadian marketers indicate that present supplies of finished bison continue to be adequate.

Bison prices in Canada are expected to continue to be sensitive to Canada - US exchange rates with price changes expected as the value of the Canadian dollar changes.

Chart 1

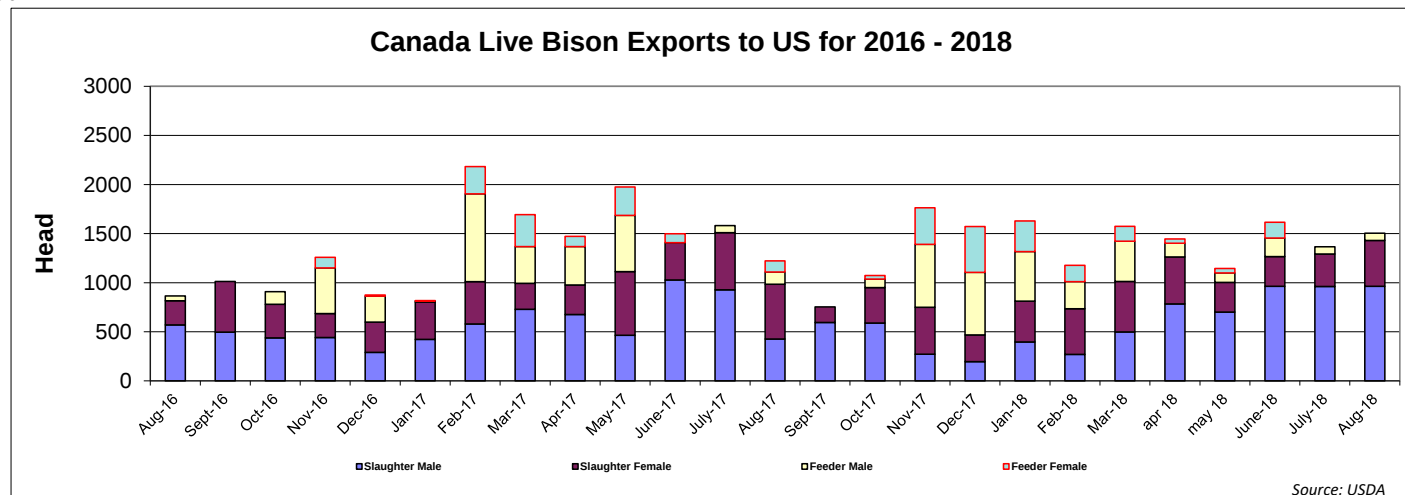

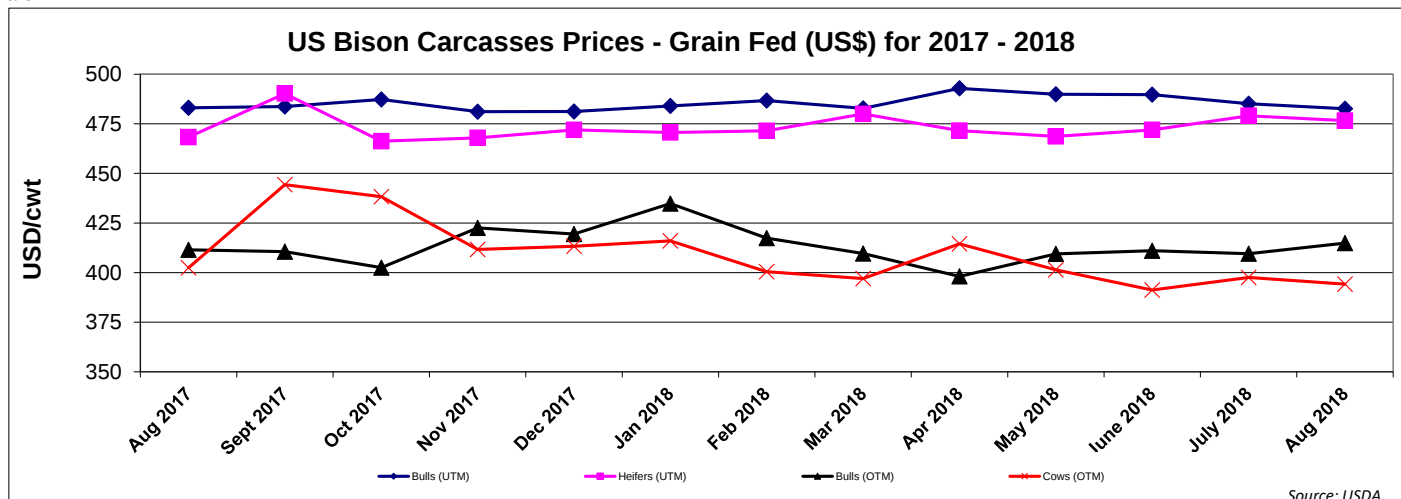

Chart 2

The Canadian Bison Industry by the Numbers.....

On another note, the 2016 Canadian Census of Agriculture data was released on May 10, 2017. Nationally, the number of bison farms and ranches reporting bison was at 81% of the 2011 levels. The number of bison reported on farms and ranches in 2016 was reported to be at about 95% of 2011 levels. According to the data, the average bison herd increased to 122 head.

Excluding the Atlantic region, there were declines in the number of farms and ranches ranging from 13.9% to 24.4% with the smallest decline in Saskatchewan and the greatest decline in Quebec.

Again excluding the Atlantic Region, the only province to report an increase in the number of bison was Saskatchewan (+2.7%), while Quebec reported the largest decrease (-35.4%).
