Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either canadianbison@sasktel.net or diane.blandford@canada.ca

As of mid-October, prices offered by Canadian buyers for slaughter in Canada ranged between $3.50 - $4.00/lb HHW for Grade "A" bison on light trading. Heifers are priced at similar levels, again on light trading. Canadian buyers purchasing bulls for slaughter in the U.S. market are paying up to CDN $5.00/lb HHW when slaughter dates are available. Heifers are priced at about 20 cents per pound lower. Carcasses that do not fall within buyers' specifications may be discounted. Final returns need adjustment for quality, transportation, and export costs.

U.S. buyers are offering USD $4.00/lb HHW for prime bulls from Canada for slaughter in the U.S., when slaughter times have been booked. They are offering USD $3.80/lb for heifers. Returns to the producers are dependent on exchange rates, quality, transportation, and export costs.

From January 1st to October 10, 2020, 4,802 bison were slaughtered in federally-inspected plants in Canada; this is 1,582 head or 24.8% below the 6,384 slaughtered during the same period in 2019.

Impacted by COVID-19, Canadian bison slaughter from April 4, 2020 to October 10, 2020 at 2,328 head is down 41.8% compared to the 4,003 head slaughtered during the same period in 2019. Continued soft foodservice demand for bison products in both the domestic and European markets, combined with limited available slaughter spaces for bison, will continue to keep Canadian bison slaughter at current levels.

Live bison exports at 19,318 head for the first nine months of 2020, are 16.5% lower than the 16,576 live animals exported during the first nine months of 2019.

U.S. consumer demand for bison products continues to be stronger than that experienced in Canada, although there are marketers experiencing softer markets. Marketers report the steady movement of various cuts with a continued build-up of trim.

In Canada, demand for bison meat products is steady, with some retailers offering fresh bison products and others offering frozen products.

Bison exports continue to Europe. As the European economy recovers, it is expected that demand for bison products will continue to increase.

Market uncertainty is expected to continue as the world and the marketplace adjust to the consequences of COVID-19.

Chart 1

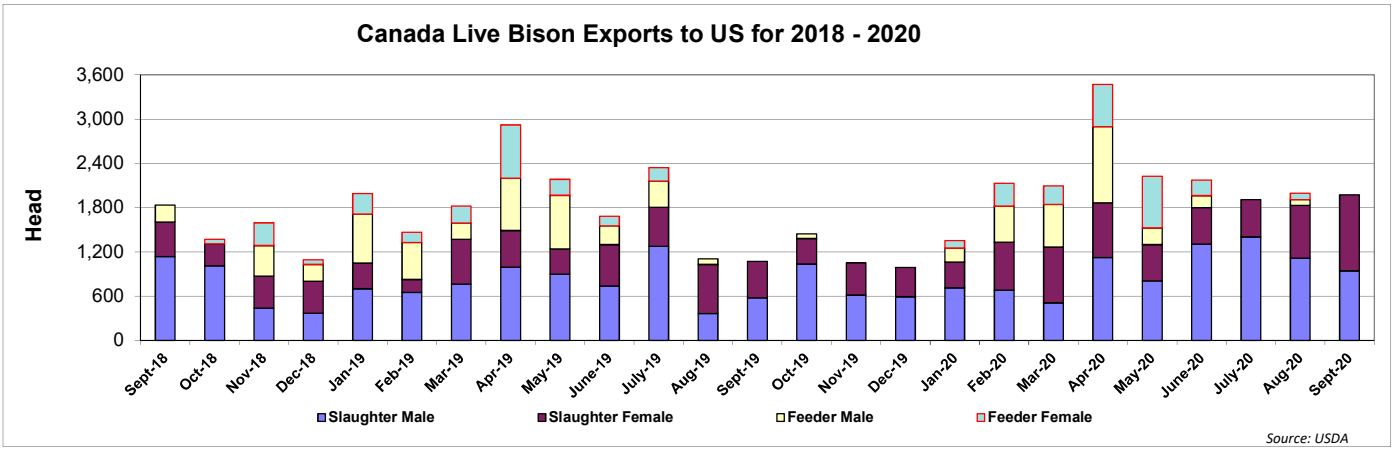

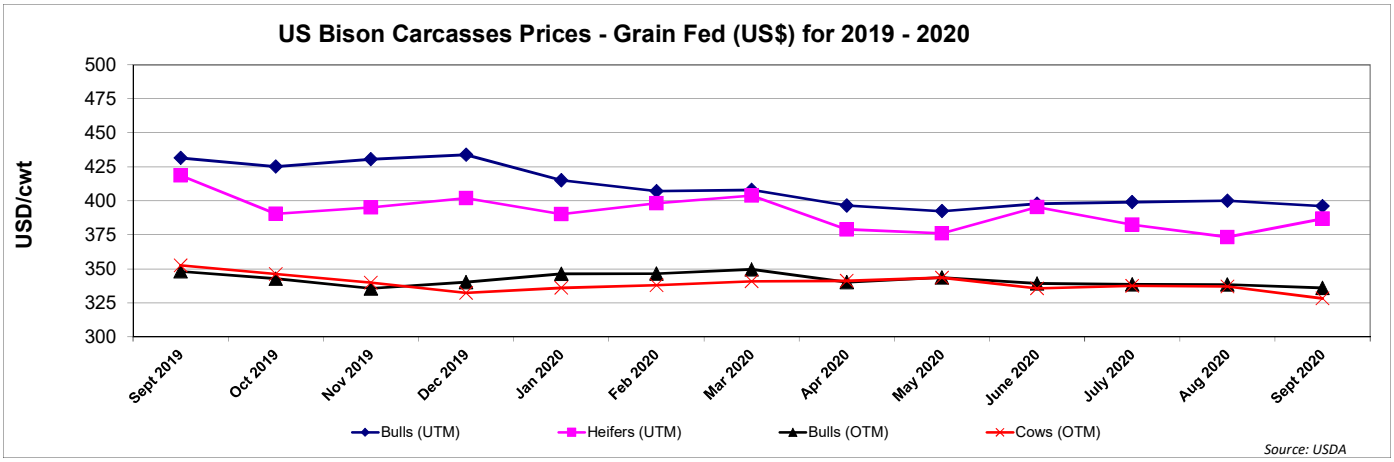

Chart 2

The Canadian Bison Industry by the Numbers…..

On another note, the 2016 Canadian Census of Agriculture data was released on May 10, 2017. Nationally, the number of bison farms and ranches reporting bison was at 81% of the 2011 levels. The number of bison reported on farms and ranches in 2016 was reported to be at about 95% of 2011 levels. According to the data, the average bison herd increased to 122 head.

Excluding the Atlantic region, there were declines in the number of farms and ranches ranging from 13.9% to 24.4% with the smallest decline in Saskatchewan and the greatest decline in Quebec.

Again excluding the Atlantic Region, the only province to report an increase in the number of bison was Saskatchewan (+2.7%), while Quebec reported the largest decrease (-35.4%).
