Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either canadianbison@sasktel.net or carmine.bianco@canada.ca

The Canadian market has shown signs of improvement. Canadian buyers are paying $4.00 - $4.15/lb. HHW on light trading. Buyers are paying $2.20 – $2.30/lb. HHW for mature cows. To May 8, 2021 there were 2,389 bison slaughtered at federally inspected plants in Canada – down 7.4% from the 2,581 slaughtered for the same period in 2020. There is an adequate supply of finished animals based on current demand.

Canadian buyers purchasing bulls for slaughter in the U.S. market are paying up to $4.90/lb. Canadian HHW when slaughter dates are available. Heifers are priced up to 40 cents lower. Carcasses that do not fall within buyers' specifications may be discounted. Final returns need adjustment for quality, transportation and export costs.

U.S. buyers are offering up to $4.00 /lb. US HHW for prime bulls and up to $3.80 /lb. U.S. for heifers from Canada for slaughter in the U.S. where slaughter times have been booked. Returns to the producers are dependent on exchange rates, quality, transportation and export costs.

Total live bison exports to the US for the first three months of 2021 at 7,790 head are 29% above the 6,038 exported in the first two months of 2020.

Statistics Canada data show total exports of boneless fresh and chilled bison for the first three months of 2021 at 250,879 Kg., is up substantially from the 120,481 Kg. exported for the same period in 2020. Exports of boneless fresh and chilled bison were reported to the United States, Saudi Arabia, Switzerland, Italy, Mexico, and the United Kingdom.

It is reported that most of the middle cuts are being sold but there is some build-up of trim and prime cuts. With the opening of restaurants in the U.S. increasing demand id being reported.

In the Canadian marketplace, fresh bison continues to be available through many of the major retail outlets in Canada as well as from farm gate market activities. Marketers also indicate that there is a sign of optimism when the restaurants are open.

Chart 1

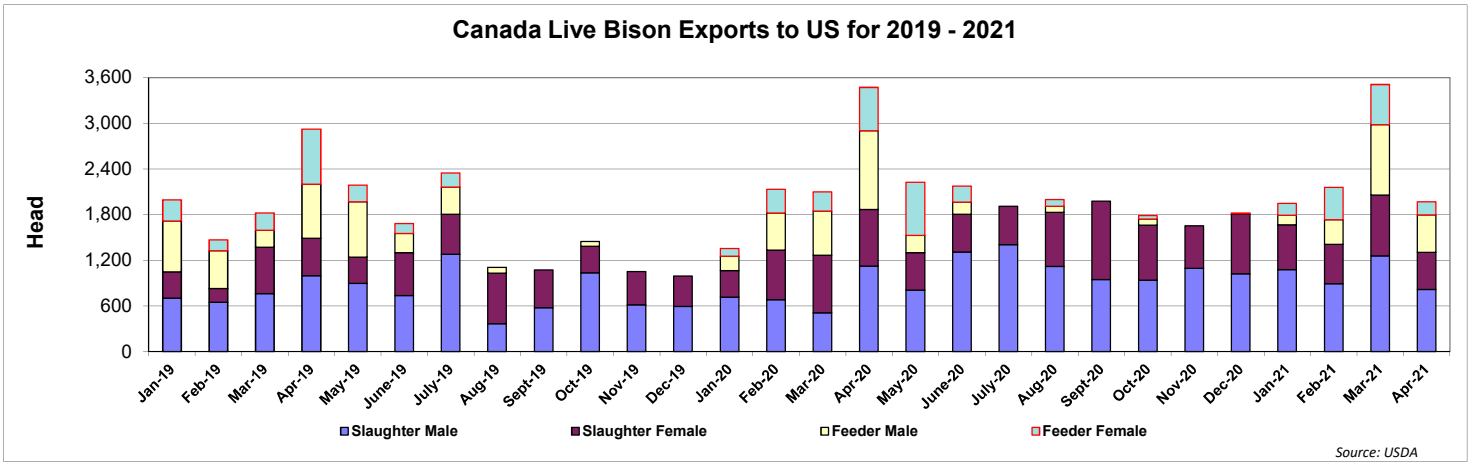

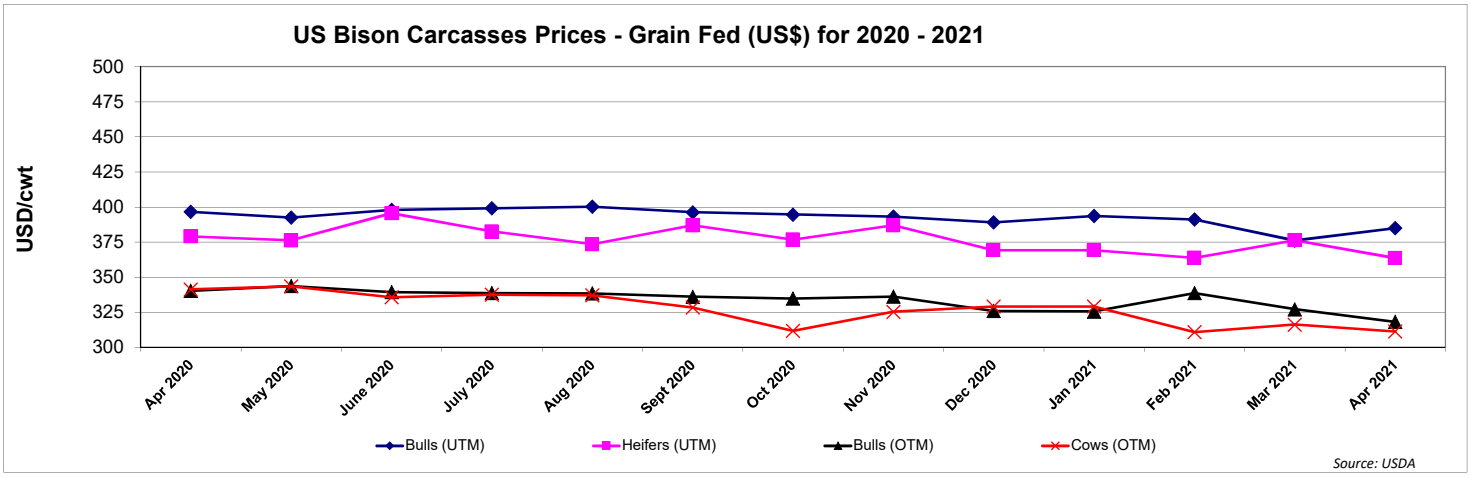

Chart 2

The Canadian Bison Industry by the Numbers…..

On another note, the 2016 Canadian Census of Agriculture data was released on May 10, 2017. Nationally, the number of bison farms and ranches reporting bison was at 81% of the 2011 levels. The number of bison reported on farms and ranches in 2016 was reported to be at about 95% of 2011 levels. According to the data, the average bison herd increased to 122 head.

Excluding the Atlantic region, there were declines in the number of farms and ranches ranging from 13.9% to 24.4% with the smallest decline in Saskatchewan and the greatest decline in Quebec.

Again excluding the Atlantic Region, the only province to report an increase in the number of bison was Saskatchewan (+2.7%), while Quebec reported the largest decrease (-35.4%).
