Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either canadianbison@sasktel.net or carmine.bianco@canada.ca

The late August and early September rains created a sprinkle of optimism amongst bison producers. Producers saw their pastures extended for two weeks or more helping them manage their costs and feed supplies.

Prices for finished bison have remained stable with Canadian buyers are paying \$4.00 - \$4.15/lb. HHW for finished prime bulls and \$3.90 - \$4.15/lb. HHW for heifers on light trading. Buyers are paying \$2.20 - \$2.30/lb. HHW for mature cows and bulls.

Canadian buyers purchasing bulls for slaughter in the U.S. are paying up to \$4.80/lb. Canadian HHW when slaughter dates are available. Heifers are priced up to 40 cents lower. Carcasses that do not fall within buyers' specifications may be discounted. Final returns must be adjusted for quality, transportation and export costs.

U.S. buyers are offering up to \$4.00 /lb. US HHW for prime bulls and up to \$3.80 /lb. US HHW for heifers from Canada for slaughter in the U.S. where slaughter times have been booked. Returns to the producers are dependent on exchange rates, quality, transportation and export costs.

To September 18, 2021 there were 5,230 bison slaughtered at federally inspected plants in Canada – up 25.1% over the 4,277 slaughtered for the same period in 2020 and 7.9% below the 5,808 slaughtered in 2019 during the same period. There is an adequate supply of finished animals based on current demand.

Total live bison exports to the US for the first seven months of 2021 at 17,238 head are 6.0% above the 16,175 exported in the first seven months of 2020.

Marketers see steady demand for middle cuts. It is also reported that certain marketers have extra inventory of bison trim as well as hip cuts. Demand in Europe and the U.S. continues to show strength.

In the Canadian marketplace, consumers continue to have access to fresh and frozen bison products in many of the major food chains from coast to coast. Farm direct producers and several local online platforms continue to serve those consumers who focus on regional products. Canadian marketers indicate that the demand is stronger in select markets with wholesale prices showing quite wide price ranges.

Chart 1

Chart 2

The Canadian Bison Industry by the Numbers.....

On another note, the 2016 Canadian Census of Agriculture data was released on May 10, 2017. Nationally, the number of bison farms and ranches reporting bison was at 81% of the 2011 levels. The number of bison reported on farms and ranches in 2016 was reported to be at about 95% of 2011 levels. According to the data, the average bison herd increased to 122 head.

Excluding the Atlantic region, there were declines in the number of farms and ranches ranging from 13.9% to 24.4% with the smallest decline in Saskatchewan and the greatest decline in Quebec.

Again excluding the Atlantic Region, the only province to report an increase in the number of bison was Saskatchewan (+2.7%), while Quebec reported the largest decrease (-35.4%).

	FARMS REPORTING BISON				NUMBER OF BISON REPORTED			
	2016	2011	2006	% Chg '16 vs '11	2016	2011	2006	% Chg '16 vs '11
