Bison Marketplace – June 2024

From January 1, 2024 to June 8, 2024, 3,309 head of bison were slaughtered in federally-inspected plants in Canada. This is 2.6% lower than the 3,398 head slaughtered during the same period in 2023. In the US, as of May 25, 2024, 33,127 bison were slaughtered in 2024; 4.8% above 2023 levels for the same period (31,610 bison).

Prices for prime finished bison bulls for the Canadian market have moved as high as \$5.35/lb HHW with heifers slightly lower. Prices for animals for the US market are as high as \$5.55/lb HHW for bulls and \$5.15/lb HHW for heifers. For the U.S. market, producers are responsible for shipping costs as well as administrative costs and vet checks for animals moving to the U.S.

According to the most recent USDA data available, 5,003 slaughter males were shipped from Canada in the first five months of 2024; 9.1% higher than the 4,585 slaughter males shipped during the same time period in 2023. Slaughter females shipped to the US in the first five months of 2024 totalled 6,530 head, which is 4.5% higher than the 6,251 females shipped in the same period in 2023. According to USDA data, in the first five months of 2024, 3,496 feeder males and 2,843 feeder females were shipped from Canada to the US.

June 2024 Prices: Stronger finished bison prices are being reported, and wholesale fresh bison cuts have moved upwards.

Chart 1

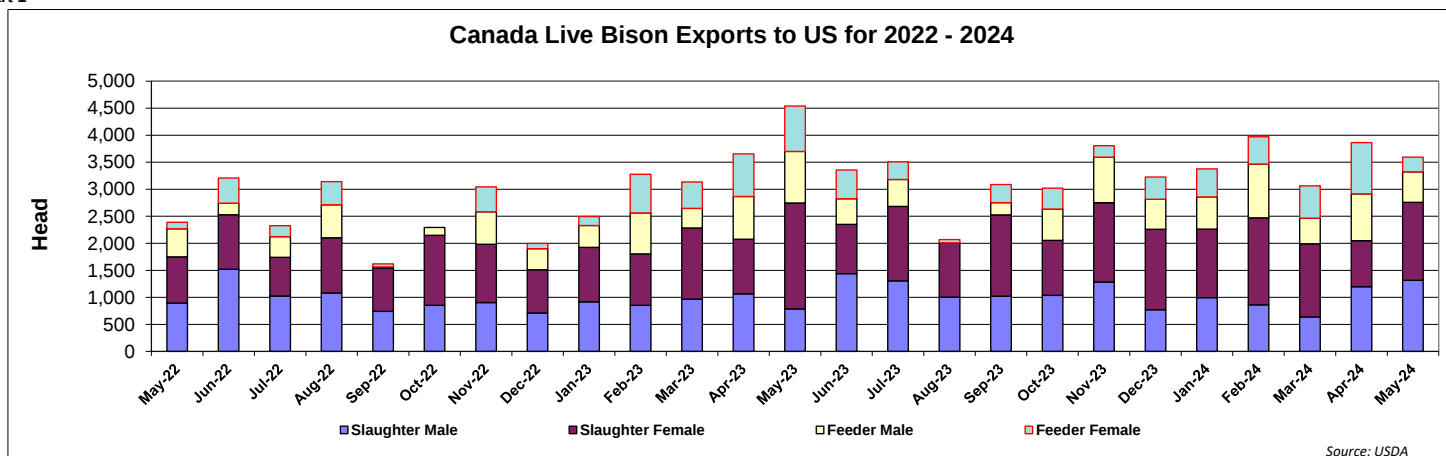

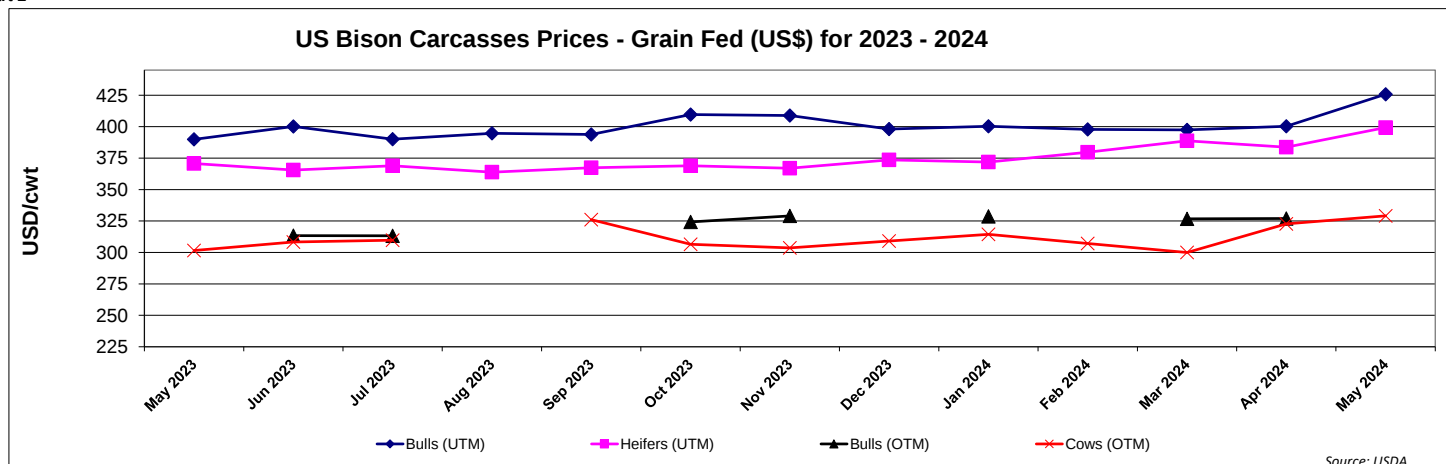

Chart 2

The Canadian Bison Industry by the Numbers.....

On another note, the 2021 Canadian Census of Agriculture data was released on May 11, 2022. Nationally, the number of bison farms and ranches reporting bison was up 1.4% from 2016 levels. The number of bison on farms and ranches in 2021 was reported to have increased by over 25% within the past five years. According to the data, the average bison herd size increased to 151 head (from 122 head in 2016).

The number of farms and ranches held relatively steady since 2016 (up by 14 farms); some provinces reported increases (Ontario and Alberta both up by 6.1%) and some reported declines (Quebec down by 23.5% and British Columbia down 12.7%).

Excluding the Atlantic Region, the only province to report a decrease in the number of bison was Manitoba (-16.4%), while British Columbia reported the most significant increase (+128.9%); more than doubling the 2016 provincial herd size.
