Prices are facing some downward pressure but continue to be strong with tight supply. Prime bulls are selling for up to \$6.90/lb HHW for harvesting in Canada and up to \$6.80/lb HHW Canadian delivered to the US market (based on this week's approximate currency exchange). Heifers are about 30 cents lower. Adjustments must be made for export processing and transportation costs for animals being shipped to the U.S. The Canadian dollar has been fluctuating in recent weeks, so watch conversion rates.

In the U.S. market, prices for finished bulls have pushed \$500/cwt USD with heifers \$25/cwt USD lower.

At a Jack Auction video sale the last week of June, 1 lot of 49 mixed wood cross 2024 animals, averaging 500 pounds sold at \$5.25/lb.

Producers should research the parameters on which the prices are based. Parameters such as Canadian or US delivery transportation costs, weight ranges, age, exchange rates etc. This will assist producers in comparing prices on an equivalent basis.
