Commentary

By Terry Kremeniuk, Executive Director, CBA

This report can only be improved with your feedback. Please send any comments that you have to either cba2@sasktel.net or diane.kelly@agr.gc.ca

Prices offered to producers in mid-July increased to $5.20 per pound HHW for Grade "A" bulls. U.S. buyers offered $4.20 U.S. with returns dependent on exchange rates, quality, transport incentives, and export costs. Canadian buyers paid up to $5.00 per pound HHW for Grade "A" heifers. U.S. buyers were offering $4.05 U.S. with returns dependent on exchange rates, quality, transport incentives, and export costs.

Nationally, federal slaughter was up 2.3% in the first 26 weeks of 2015 (week ending June 27, 2015) when compared to 2014 levels (5,975 animals in 2015 compared to 5,840 animals in 2014). Live animal exports for the first six months of 2015 were 12,489 head – up by 42% when compared to the 8,803 head exported in the first six months of 2014. This significant increase has been driven by strong consumer demand and the lower value of the Canadian dollar relative to the US dollar.

Marketers report that there is continued strong demand for bison trim and hip cuts in the United States and Canada. In Canada, demand for other cuts is steady with some consumer price resistance being reported. There are reports of some orders for ground products being shorted. European demand is reported to be steady There is a small inventory build-up of strip loins and tenderloins.

Some reports indicate that present supplies of finished bison are tight while others see a shortage of live bison for processing. Bison prices in Canada are expected to continue to be sensitive to Canada- US exchange rates.

As previously indicated, increased exports of feeder animals to the US is expected to create shortages in the Canadian market next year.

Chart 1

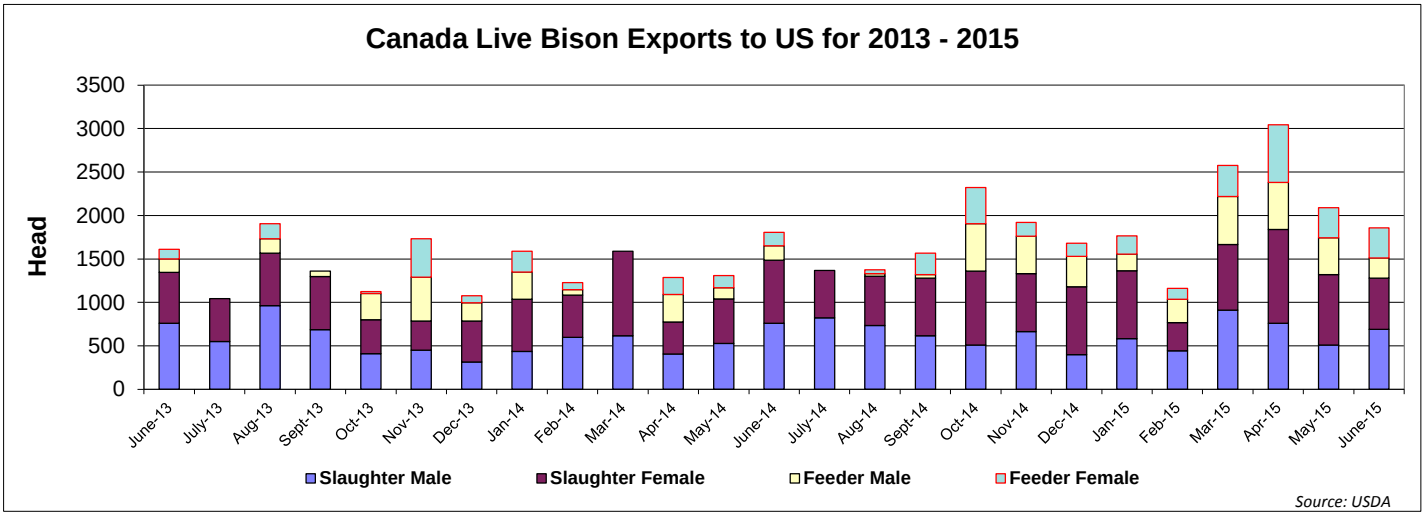

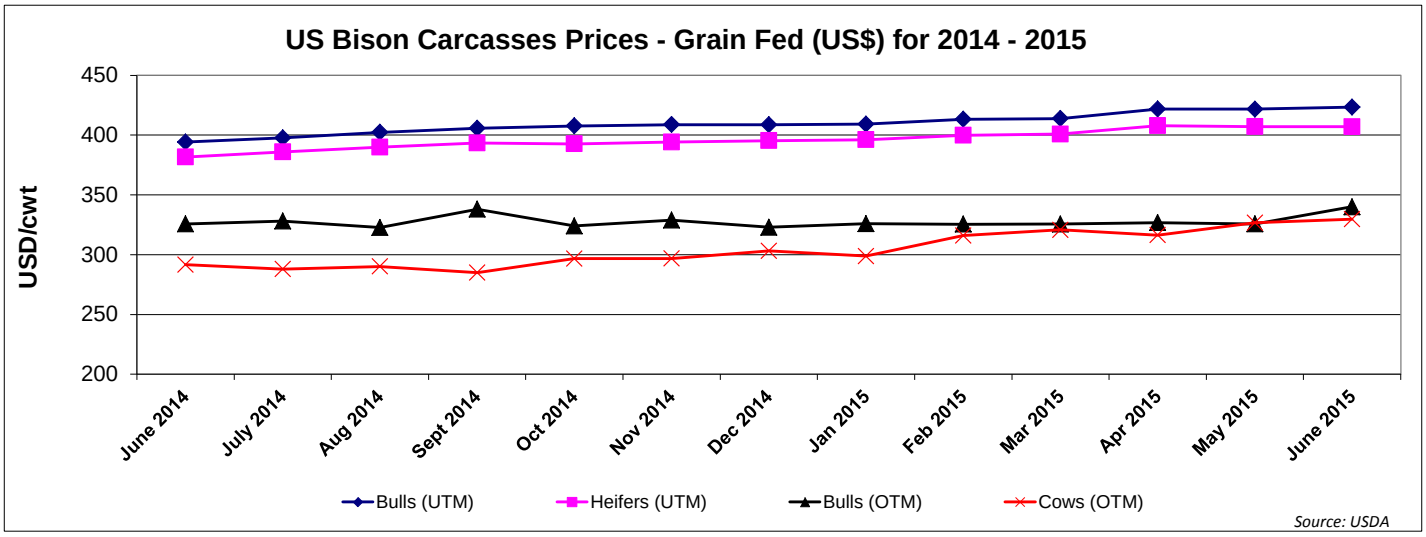

Chart 2

The Canadian Bison Industry by the Numbers…..

On another note, the 2011 Canadian Census of Agriculture was released on May 10, 2011. Nationally, the number of bison farms and ranches reporting bison was at 64% of the 2006 levels. The number of bison reported on farms and ranches in 2011 was also reported to be at about 64% of 2006 levels. According to the data, the average bison herd has remained at 103 head.

Excluding the Atlantic region, there were declines in the number of farms and ranches ranging from 15.5% to 41.3% with the greatest decline in British Columbia and the smallest decline in Ontario.

Again excluding the Atlantic Region, there were declines in the number of bison on farms and ranches in Canada ranging from 27.3% to 44.9% with the greatest decline in QC and the smallest decline in BC.
