

Battle River Bison

Richard Allan

We have been in the bison industry for 12 years. We started after we moved here from Alberta. Bison were in the area where I grew up since the 1970's. I always enjoyed going to their farm and learning about these magnificent animals.

I am proud that all of our animals are raised naturally and grass fed. No antibiotics or growth hormones are used on our herd. We are located in prime grazing territory between Perth and Carleton Place, Ontario. Although we are growing every year, we keep our animal density low, ensuring that each animal has ample room to graze and run freely.
